

1 Display math and list inside a flag

FIGURE FLAG F4a.4 — Burst-time density

Exact content. Plot the defective density

$$\varphi(t) = \delta J(t), \quad J(t) = \frac{(a-b)^2 w}{(B + Aw)^2},$$

together with the conditional density $\varphi/(1-b)$.

- panel (a): (1, 0.2, 0.05)
- panel (b): (1, 0, 0.1)

Placement. Section 7.
