$\mu = 0,\ \lambda = 1,\ \delta = 0.1$
(a)
$1 + \lambda/\delta = 11$
Mean value
$J(t)/I(t)$
$V(t)$
t
$\lambda = 1,\ \mu = 0.2,\ \delta = 0.05$
(b)
$a/(a-1) = 17.23$
Conditional mean load
$J(t)/I_{\mathrm{fix}}(t)$
$J(t)/I(t)$
t
